

Topic: 5 scientists who saved millions of lives with their inventions.

A gerund is a type of verbal noun that functions as a verb in a sentence. It is formed by adding **-ing** to the base form of a verb, and it is often used to express an action or to describe a state of being. Gerunds can be used in many different ways, such as subjects, objects, and modifiers. They are often used to describe ongoing processes or repeated actions.
